My name is Chris Migliore, and I am asking for your vote for Parish Council. I am a lifelong Catholic with five beautiful children. I have been a member of St. Patrick's since 1998. I am an online member of the Knights of Columbus, and at one time was a CCD teacher.

I am considered a jack of all trades with experience in construction and with hobbies such as rebuilding cars and carpentry. I am a civil servant employed as a Contract Management Team Quality Functional Specialist. As part of my regular duties I review contracts and apply and instruct others in the technical and legal requirements. I perform risk analysis, identify trends, and monitor the quality programs of Defense Contractors. This includes monitoring schedules and milestones, as well as inspecting products, reviewing processes, and auditing Quality Management Systems. In addition, I have six years of logistics experience.

I have a Master of Science in Management, Bachelor of Science in Professional Aeronautics, and an Associate of the Arts in Psychology. I obtained the Demonstrated Senior Logistician Designation from the Society of Logistics Engineers. I recently obtained Six Sigma Greenbelt Certification which is tools and techniques for process improvement, as well as DAWIA certification in Program Management. I also attended Technical school for HVAC.

I am running for the Council in order to offer my skills and experience to the Lord and to the people of St. Patrick's. I also desire to set an example for my children by taking a more active role in parish life. It is my hope that that by serving I can be an asset to our Parish.
